

Mandated vaccine laws are here for children AND adults — and will keep coming! Pharma is pushing profit above public health and taking away our fundamental RIGHT to decide what goes into our bodies.

It will take MILLIONS of us out on the streets educating the public on VACCINE REALITY.

There are nearly 300 vaccines in development and the US already gives 2-3x more vaccines than most developed countries. We are sicker than we have ever been. **NOT A COINCIDENCE!**
